

PREVENTING CHILD SEXUAL ABUSE

IN ORGANIZATIONS

The Centers for Disease Control and Prevention (CDC) has developed six key components for preventing child sexual abuse within youth serving organizations.

COMPONENT 6: Training About Sexual Abuse Prevention

The goal of this component is to give people information and skills to help them prevent and respond to child sexual abuse.

- The organization provides training on its policies and procedures related to child sexual abuse prevention for staff and volunteers and reviews policies annually.

- The organization informs caregivers on its policies and procedures relating to child sexual abuse prevention and what is expected of staff and volunteers.
- The agency provides staff and volunteers information and facts on child sexual abuse.

A2A provides training for youth serving organizations on enhancing their policies and procedures to protect children in their programs. Go to www.a2awisconsin.org for more information.
